

Trellis Makeovers

PREP:
Wash down, leave to dry fully & remove any loose splinters. Use a good quality 1" or 1.5" paint brush and apply 1-2 coats of wood stain.

Decorating a trellis can be a time-consuming job but it's definitely worth the effort. A small amount of coloured woodstain from Protek's Royal Exterior or Wood Stain & Protector ranges can transform a dull looking trellis in to a thing of beauty that supports and creates a backdrop to plants and flowers as part of a stunning display.

APPLICATION:
Start at the top of the trellis painting the external & internal sections first then finish with a coat on the top struts brushing out any drips along the way.
