Water-Proofing Timber Treatment

Timber Eco Shield is an advanced water-based micro-porous timber treatment using the latest high-tech nanotechnology. It creates a long lasting waterproof wood coating that is friendly to its environment.

Product Key Facts

Brand new technology for water-proofing wood
Child, Pet and Plant friendly

Suitable for all types of wood

Great coverage & easy application

Low odour with low VOC's

Available in 1, 2.5, 5 and 25 litre containers

Available in 9 natural colours and a Clear

Application tips

Suitable for all types of wood.

For the first treatment, two coats of Timber Eco Shield is recommended and will give a traditional matt finish. It can be used on all outside timber, for the ultimate performance we advise that the timber has a wood preservative pre-treatment. Timber Eco Shield will prolong the life and good looks of your timber by protecting it against the damage caused by the sun and rain.

Can be applied by brush, roller or sprayer.
